

3M Health Information Systems

# Coding Compliance Editor - Monitoring Data Quality

## Data Quality Seminar

11 September 2012

# Agenda

- Define CCE
- CCE Solution Objectives and Benefits
- CCE Business Processes
- CCE Product Functionality
- Data Quality Management Control and Use of CCE

## What is CCE?

- MHS **C**oding **C**ompliance **E**ditor
- Suite of 3M Commercial-Off-The-Shelf (COTS) products / tools that support patient centric data collection at the MTF level
  - *Assign / audit medical code sets*
  - *Abstract data required by MHS*
- Software suite solution focused on coding, compliance and data management

## CCE Solution Objectives

- Improve data quality
- Reduce risk for non-compliance
- Trend performance of healthcare professionals
- Enhance Military Treatment Facility (MTF) reporting in core management
- Improve revenue generation and collection
- Support the MHS move toward commercial environment

# CCE Product Suite

## 3M Coding & Classification

- *3M™ Coding & Reimbursement System*
  - *3M™ CodeFinder™*
  - *3M™ DRGfinder™*
  - *3M™ HCPCS/CPTfinder*
  - *3M™ Clinical Analyzer*
  - *3M™ Reimbursement Calculation*
- *3M™ Physician Coding & Reimbursement System*
- *TRICARE Grouper*
- *3M™ APCfinder™*
- *APG Grouper*
- *3M™ APR-DRGs*
- *3M™ Coding Reference Software*
- *3M™ Coding Reference Plus*

## 3M™ Database Products - HDM

- 3M™ Health Record Management Plus
- 3M™ Medical Necessity Software

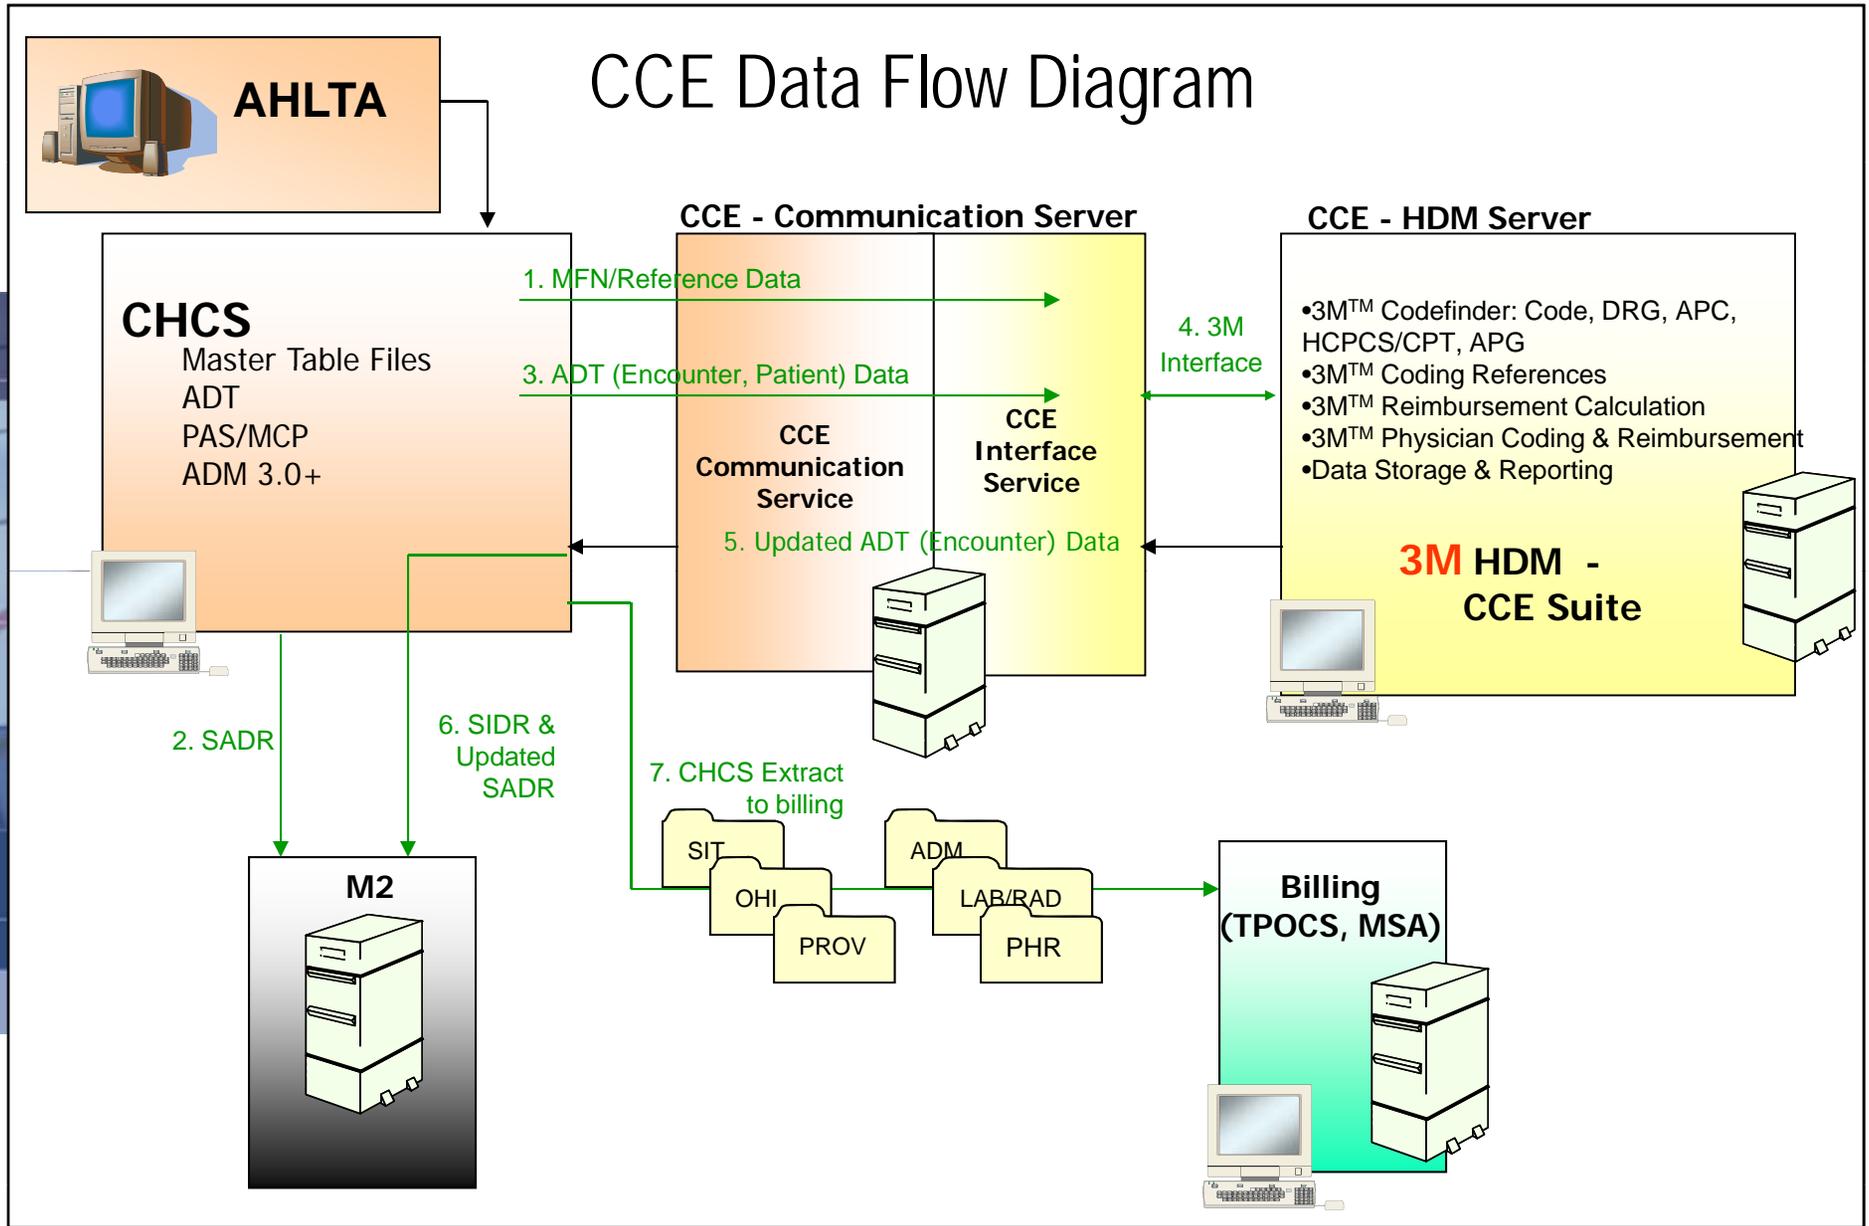

Outpatient and Inpatient Products  
Outpatient Only Products  
Inpatient Only Products

# Basic Functionality

- Patient Centric Data Collection
  - *Coding/grouping products integrated into database for seamless functionality*
  - *Expert clinical decision logic and integrated coding and clinical references*
  - *Multiple groupers and code edit methodologies in a single coding episode*
  - *Industry standard edits to identify potential compliance issues for resolution at the coding level*
  - *SIDR / SADR / Business process edits to meet MHS data requirements*
- Work lists to assist in managing daily coding workload
- Comprehensive data collection and reporting capability for management in support of service areas and daily operations

# CCE Data Flow Diagram

## CCE Business Processes (OP)

- Business Processes - Outpatient

- *Initial data entry by clinic/service area (AHLTA) for outpatient*
- *Initial SADR record created prior to CCE interface load*
- *CCE edits 100% of encounters*
- *Coder role becomes one of an auditor in support of data quality, compliance, reimbursement and operational data*
- *Process and tools available for provider query when documentation does not support coding*
- *Write-back to CHCS upon CCE completion*
- *Updates SADR when changes are made in CCE*

# CCE Business Processes (IP)

- Business Processes - Inpatient
  - *Demographic data interfaced to CCE*
  - *All coding completed in CCE*
  - *CCE edits coding in inpatient record*
  - *Coder role supports data quality, compliance, reimbursement and operational data*
    - *Some SIDR edits are incorporated into field and chapter level in CCE*
  - *Write back to CHCS upon CCE completion*
    - *Final SIDR edits are performed in CHCS*
  - *Coder completes and approves record in CHCS*
  - *Initial SIDR record created per usual process following completion of coding in CCE*
  - *Records will be regrouped and retransmitted if critical data elements change*

# What is in CCE?

CCE System	MEPRS	Description
Inpatient System	A***	Inpatient Encounters
Rounds	A***	Professional Rounds / IBWA
ER	BIA*	Emergency Medical Clinic
APV	B**5	Ambulatory Patient Visits
	C**5	Dental Surgery
OP	B	Outpatient visits,
	F	Immunizations, hearing
	D	Ancillary visits
OBS	B**O	Observation

## Data Quality Monitoring in CCE

- 3 views of coding for outpatient
  - *Initial provider coding*
  - *Final provider coding*
  - *Professional coder*
- Outpatient coding edits – OCE, NCCI, MN
- Inpatient Medicare Code Edits
  - *Embedded coding edits and rules in 3M Coding tool*
- Field and chapter level edits help ensure data integrity
- Encounter records can not be completed without required data elements

# Ambulatory Coding

- Coding and data collection
  - *Patient and encounter demographic*
  - *Providers: appointment, secondary and procedure*
  - *Up to 99 codes diagnosis and procedure codes*
  - *Procedure episode information*
  - *Grouping and reimbursement results*
    - *RBRVS*
    - *APG*
    - *APC*
  - *Edit results*
  - *HIPAA Injury and Pregnancy data*
  - *Coding productivity*
  - *Record management information*

# Outpatient Coding

The screenshot shows three overlapping windows of the 3M HDM Data Entry software. The top window is titled '3M HDM Data Entry - [Edit Record -- 343841 UpdProv, Complete [OP 3438410 19/06/2006]'. It has a menu bar (Main, Record, Print, Window, View, Help) and a toolbar with buttons for Recall, Delete, Restore, Save, Abort, and Submit. Below the toolbar are tabs for Patient Info, Enctr Data, Prov Codes, Prov Med Necity, Prov NCCI/OCE, Prov RBRVS Info, and Prov A. The main area contains a table with columns 'Occ', 'Prompt', and 'Data Entry'. The table lists various data entry points for patient information, including dates, complaints, and codes.

The middle window is a smaller version of the same software, showing a similar table structure. The bottom window is another instance, displaying a table with columns 'Occ', 'Prompt', and 'Data Entry', listing various medical codes and their descriptions.

- Multiple Views of Codes stored
- Provider – initial and final
  - Professional Coder
  - Procedure related information:
    - CPT code and description
    - Diagnosis link to CPT code
    - Procedure date
    - Operating provider
    - Modifiers
    - Units of service
    - RVU at code and summary level
    - Ability to store up to 99 codes

# Coding Edits

## Using CCE for Data Quality

- CCE helps to identify patterns/trends in quality of data across MTF, not just audit sample
- Provides ability to drill down to patient level data
- The following slides are samples of reports that may be used to perform routine monitoring and/or conduct focused audits
  - *All data contained in the CCE chapters and fields may be used for reporting*
  - *RBRVS or RVU calculations are based on the CMS national physician work component, not MHS weights*
  - *APG calculations are national and based on weights developed with MHS data input*

# Getting Started: Using CCE to Evaluate Data Quality

Do I have a problem?

- Begin with high level Summary reports
  - *Are there any obvious patterns, trends or outliers?*
- Drill down to Summary reports with more detail
  - *Does the Summary detail support or refute initial findings?*
- If yes, run associated Listing report(s)
  - *Evaluate individual encounter or admission report findings*
- Use CCE data to focus efforts in evaluation, resolution and training

## Timeliness Metrics

- 1a. What percentage of clinics have complied with End of Day processing?
- 1b. What percentage of appointments were closed in meeting your “End of Day” processing requirements, “Every appointment – Every day?”
- 2a. What percentage of OP Encounters, have been coded within 3 business days of the encounter?
- 2b, What percentage of APVs have been coded within 15 days of the encounter?

# Coding Timeliness Reports

**Reminder** - Encounter comes to CCE **after** coding in ADM completed and passes SADR edits

- CCE Timeliness Compliance Report by Ambulatory Encounter Date
  - *Summary by encounter date*
  - *Time from Encounter date to CCE load (calendar days)*
  - *Are there any patterns, trends or outliers in this data?*
  - *Identify possible problem days*

CCE Timeliness Compliance Report by Ambulatory Encounter Date - OPJan 2007									
Year	Month	Encounter Day	0-1 Days	2-3 Days	4-6 Days	7-10 Days	11-15 Days	>15 Days	Total Encounters

## CCE Timeliness Compliance Report Listing (3M)

- Prompted by MEPRS
- May be used to identify potential issues with record completion in AHLTA or CHCS
- Report assigned to Coder Productivity, Clinic Productivity, Provider Performance, Data Quality and DoD RADs

# Data Quality Management Control

- 5b. Percentage of Inpatient Professional Services Rounds encounters E&M codes audited and deemed correct?
- 6b. What is the percentage of (*outpatient*) E&M codes deemed correct?

# E&M Assignment

- Ambulatory Patient Procedure Analysis
- Is there anything concerning or suggests further investigation in this data?

# Accuracy of CPT Coding

- 5d. Percentage of Inpatient Professional Services Rounds encounters CPT Codes audited and deemed correct?
- 6d. What is the percentage of (*outpatient*) CPT codes deemed correct?
- 7d. What is the percentage of (*APV*) CPT codes deemed correct?
- High level analysis of potential patterns of variance at a clinic level
- Compare RVU totals within a clinic, between similar clinics or trends over time
