HEALTH AFFAIRS

Introduction to PHIMT

What is the PHIMT?

- The PHIMT is a web-based application that assists in complying with the HIPAA Privacy Disclosure Accounting Requirement
 - Commercial Off-The-Shelf (COTS) product customized for TRICARE Management Activity (TMA)
 - Deployed in October 2003 with a series of training supporting the deployment to the Military Treatment Facilities (MTFs)
 - Centrally managed application that is accessed via the Internet

HEALTH AFFAIRS

Introduction to PHIMT

Why Does the PHIMT Exist?

- The HIPAA Privacy Rule requires a Covered Entity (CE) to maintain a history of when and to whom disclosures of protected health information (PHI) are made for purposes other than treatment, payment and healthcare operations (TPO)
- Individuals have the right to receive an accounting of disclosures of PHI made by the CE
- The Military Health System (MHS) must be able to provide an accounting of those disclosures to an individual upon request
 - Not required to account for disclosures that occurred prior to the April 14, 2003 compliance date
- To comply with this requirement, TMA provides an electronic disclosure-tracking tool

HEALTH AFFAIRS

Introduction to PHIMT

Tool Capabilities

- The tool enables users to:
 - Track PHI requests or release of information
 - Maintain authorizations
 - Track complaints
 - Create an automated workflow process developed by the users
 - Create pre-defined requesters from organizations
 - View the details about the information disclosed
- It allows users to track disclosures, document requests for amendments and authorizations, document complaints and restrictions to PHI

HEALTH AFFAIRS

Introduction to PHIMT

Advantages of the PHIMT

- Web based, centrally managed system
- Over 2000 users worldwide
- Protects the data
 - Allows for role-based access in maintaining the records and accessing patient information
 - DISA Protected Enclave
 - Defense Information Assurance Certification and Accreditation Process (DIACAP) certified
