Step 2 Please consider the following:

- 32 CFR 199.21 (j)(2) Use of generic drugs under the pharmacy benefits program. The pharmacy benefits program generally requires mandatory substitution of generic drugs listed with an "A" rating in the current Approved Drug Products with Therapeutic Equivalence Evaluations (Orange Book) published by the FDA and generic equivalents of grandfather or Drug Efficacy Study Implementation (DESI) category drugs for brand name drugs. In cases in which there is a clinical justification for a brand name drug in lieu of a generic equivalent, under the standards and procedures of paragraph (h)(3) of this section, the generic substitution policy is waived.
- The generic products are A-rated by the Food and Drug Administration for bioequivalence and therapeutic equivalence to the brand name product. An A-rated product will produce comparable absorption and blood levels to the brand name product. It is the judgment of the FDA that based on its determination of therapeutic equivalence between generic and innovator drug products, "products evaluated as therapeutically equivalent can be expected to have equivalent clinical effect whether the product is brand name or generic drug product."

1. Has the patient tried the generic product?	<input type="checkbox"/> Yes Proceed to Question 2	<input type="checkbox"/> No Proceed to Question 3
